업체소개 :

During our existence of more than 25 years, we have worked closely with the biggest names in the embedded & server industry and created for them products always at the edge of technology. Carried by our many years of know-how in motherboard design, it is our passion to create products for the server industry. Using only the most reliable components and the best features, we always aim for the highest quality standards. One of the lowest return rates on the market, unique configurations and features, competitive price/quality ratios... and of course a solid and renowned brand. Plenty of reasons to persuade the most demanding customers!

1. Intelligent IoT Gateway Solution

- A Fast to Deploy Internet Gateway Solution
- Intel Atom E3825 dual-core processor
- Mainly designed for industrial applications in, where it can serve as a data aggregation, filter and sharing hub between data generating devices and data analysis ones.

*Features

<http://b2b.gigabyte.com/products/product-page.aspx?pid=5445#ov>

2. OPS Digital Signage Barebone

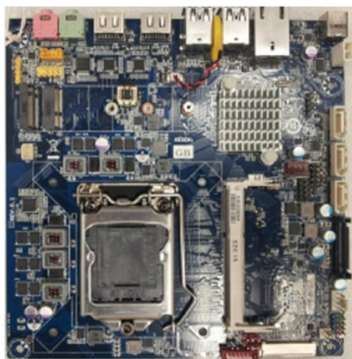

- Simplified installation thanks to the absence of cabling
- Space saving
- Seamless upgradability, through an interchangeable module built on a modular and scalable concept
- High reliability with a single JAE connector for all the data transfers
- Better serviceability with active management capabilities and an easily swappable chassis

* Features

<http://b2b.gigabyte.com/products/product-page.aspx?pid=5443#ov>

3. Standard Rackmount Server

- 2U standard server
- Support Intel? Xeon? processor E5-2600 V3 product family

- 24 x RDIMM/LRDIMM ECC DIMM slots
- 24 x 2.5" hot-swappable HDD/SSD bays
- Memory frequency will not downgrade in all kinds of population
- Gigabyte easy BIOS update function

* Features

<http://b2b.gigabyte.com/products/product-page.aspx?pid=5296&kw=R280-F2O1.0#ov>

4. High Performance Computing Server

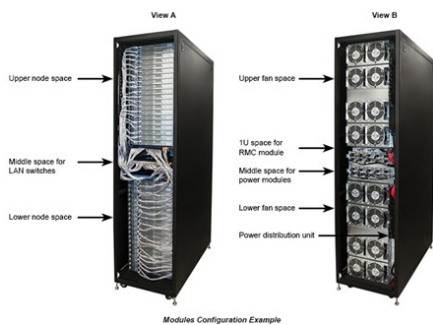

- Highest density upto 8*GPU within 2U chassis in the market
- Gigabyte proprietary LAN card slot providing network upgrade ability
- Memory frequency will not downgrade in all kinds of population
- Gigabyte easy BIOS update function

* Features

<http://b2b.gigabyte.com/products/product-page.aspx?pid=5404#ov>

5. DataCenter solution

- Cutting edge modular design
- Extreme power efficiency
- Full scalability
- Easy assembly & handling

*Features
